

Smoke Free and Tobacco Free Community

Webster University students, faculty, staff, alumni and visitors deserve the healthiest possible place to live, work and learn. While we respect the rights of those who use tobacco and other nicotine products and smoking devices, research continues to show that the use of cigarettes, cigars, pipes, smokeless tobacco, and other tobacco products, as well as exposure to secondhand smoke, leads to disease and premature death for smokers and non-smokers alike. In addition, cigarette litter and smoke are toxic to our environment.

Because it is important to protect our community from these serious health risks and adverse environmental effects, all campus buildings are designated as smoke free areas. Smoking is not permitted in front of the whole façade of the building Praterstrasse 23. See red area.

Smoking is permitted underneath the trees in front of Praterstrasse 21 underneath the trees where you can find ashtrays and benches. There is also another waste in with ashtray outside of the Spar supermarket.

We thank you for your cooperation in this matter, and for contributing to a healthy and respectful neighborhood!
