Instructor: Ms. Beverly Piersol

Meeting Time: Tuesday, 2 – 5 p.m., on November 11, 18, 25, and December 2.

Class Limit: 15

This course examines the commercialization of culture (Is Mona Lisa a show girl?) The promotion of culture has changed in the last 10-20 years. Museums and historical institutions have, through budget cuts and increasing restoration and maintenance costs, been forced to find new ways of making their collections or places "popular". Value is no longer the historical importance of a place or collection but its value as a commodity to attract paying visitors. Quality of advertising has

become more important than the quality of the cultural "commodity". This course will touch on these phenomena by addressing the questions of how and why this is done and if the results are satisfactory to the institution and the public. The course will offer the students the possibility to visit some of Vienna's more well-known and commercially promoted institutions and to talk with directors, curators, or personnel and to ask questions about the current problems involved with running an institution as well as about the institution's approach to commercialization and its success. (Some time will be provided for a visit to the venue as a live illustration of HOW this is done.) The course should provide students with a brief introduction to the problems faced by both managers of institutions and the curators trying to present the collections in an attractive but educational way.

ART 2020/52 – STUDIO SEMINAR: INTRODUCTION TO VISUAL LITERACY

Instructor: Dr. Monika Schwärzler-Brodesser
Meeting Time: Tuesday and Thursday, 9 – 11 a.m.
Class Limit: 25

According to Moholy Nagy (a Hungarian photographer who worked at the Bauhaus) the illiterate person of the future will be the one who is unable to read images. This statement from the 1920's seems to have proven valid. A major part of our messages today is delivered in visual form. These visual messages appear in high complexity and are sometimes processed in enormous speed. We have to be capable "readers" to decipher them, and we also need to be familiar with the visual codes that organize these messages. It is the aim of this course to enable the student to deal with the visual input of our time in a knowledgeable and critical way, to obtain insight into the making of images, and to ultimately understand that most visual codes involved are mediated by the past.

ART 2020/53 – STUDIO SEMINAR: DRAWING PRACTICE (1-CREDIT COURSE)

The course is offered for one credit on a Pass/Fail basis, so a specific letter grade will not be assigned at the end of the term. A passing grade will be based on attendance and demonstrable improvement. A portfolio of drawings completed during the term must be submitted for evaluation.

For this purpose we will be examining a series of essays written by the current British Prime Minister, Gordon Brown. The theme of the course is courage. Generation, culture, era, gender, geographical location, politics, history: how do all these flow into creating "heroes"? What needs and aspirations of the "people" find an echo in these popular heroic figures? And how is the notion of a hero changing? What do the eight figures chosen by Gordon Brown have in common? How can they inspire us today? This is a reading- and writing-intensive course that challenges the student both to improve his or her English in a short period of time, and to assess his or her own value system by benchmarking it next to truly extraordinary lives.
