WVPU Guidance in the context of COVID-19 positive case among the student body

If you experience symptoms, please stay at home, call the Austrian COVID-19 hotline 1450, and let us know immediately if you tested positive by sending an e-mail to CV19.taskforce@webster.ac.at.

The following will happen if a student tests positive and once he/she/they sends us an email showing a positive test result:

1. Affected students will be asked to provide a list of all classes they attended and each staff and faculty they met in the days prior to their symptoms. Also, they will need to provide a list of other Webster students they met outside of their classes and with whom they have been in close contact for more than 15 minutes (contact tracing).
2. All the courses that affected students attended will go remote for the following 5 days.
3. Everyone the student met will be asked to take a PCR test before they are allowed to return to campus.
